

21

Pattern

public class pattern

```

{
    public static void main (String[] args)

```

```

{
    Scanner input = new Scanner (System.in);

```

```

    char c = input.next().charAt(0);

```

```

    int n = input.nextInt();

```

```

    for (int i=1; i<=n; i++)

```

```

    {

```

```

        for (int j=1; j<=i; j++)

```

```

        {

```

```

            System.out.println(c);

```

```

        }

```

```

        System.out.println();

```

```

    }

```

```

}

```

```

}

```

22

leap year or not

public class leapyear

```
public static void main (String[] args) {
```

```
Scanner input = new Scanner (System.in);
```

```
System.out.print (" ");
```

```
String out = year.input();
```

```
String arr = year.split (" / ");
```

```
String d = arr[2];
```

```
int num = Integer.parseInt(d);
```

```
if ((num % 4 == 0 && num % 100 != 0) ||
```

```
num % 400 == 0 )
```

```
System.out.println ("It is a leap year")
```

```
else
```

```
System.out.println ("It is not leap year");
```

23) Factorial:-

```
public class Factorial {
```

```
public static void main (String[] args) {
```

```
Scanner input = new Scanner (System.in);
```

```
int n = input.nextInt();
```

```
int factors = 0;
```

```
for (int i = 1; i <= n; i++)
```

```
{
```

```
    if (n % i == 0)
```

```
        factors = factors + 1;
```

```
}
```

```
System.out.print("Number of Factors = " + factors);
```

```
}
```

```
}
```

4. perfect number:-

```
public class perfect {
```

```
    public static void main (String [] args) {
```

```
        Scanner input = new Scanner (System.in);
```

```
        int n = input.nextInt();
```

```
        int factors = 0;
```

```
        for (int i = 1; i < n; i++)
```

```
        {
```

```
            if (n % i == 0)
```

```
                factors = factors + i;
```

```
        }
```

```
        if (n == factors)
```

```
system.out.println("IF is a perfect number");
```

```
else
```

```
system.out.println("It is not a perfect number");
```

```
}
```

```
}
```

25) vowels

```
public class vowels {
```

```
public static void main (String args) {
```

```
Scanner input = new Scanner(System.in);
```

```
String name = input.nextLine();
```

```
int len = name.length();
```

```
char a[] = new char[len];
```

```
int row = 0;
```

```
for (int i = 0; i < len; i++)
```

```
{
```

```
    a[i] = name.charAt(i);
```

```
    if (a[i] == 'a' || a[i] == 'e' || a[i] == 'i' || a[i] ==
```

```
        'o' || a[i] == 'u' || a[i] == 'A' ||
```

```
        a[i] == 'E' || a[i] == 'I' || a[i] == 'O' ||
```

```
        a[i] == 'U' ;
```

```
        row = row + 1;
```

```
}
```

```
System.out.println(row);
```

vowels and consonants

```
public class consonants {
```

```
    public static void main (String[] args) {
```

```
        Scanner input = new Scanner (System.in);
```

```
        String name = input.nextLine();
```

```
        int len = name.length();
```

```
        char[] a = new char [len];
```

```
        char[] vowel = new char [len];
```

```
        char[] con = new char [len];
```

```
        int v = 0, c = 0;
```

```
        for (int i = 0; i < len; i++)
```

```
        {
```

```
            a[i] = name.charAt(i);
```

```
            if (a[i] == 'a' || a[i] == 'e' || a[i] == 'i' ||
```

```
                a[i] == 'o' || a[i] == 'u' ||
```

```
                a[i] == 'A' || a[i] == 'E' || a[i] == 'I' || a[i] == 'O'
```

```
                || a[i] == 'U')
```

```
                vowel[v++] = a[i];
```

v++;

}

else {

con[r] = a[r];

c++;

}

}

System.out.print("consonants: ");

for (int i = 0; i < v; i++)

{

System.out.print(row[i]);

}

System.out.print(" ");

}

System.out.print("\n vowels: ");

for (int i = 0; i < c; i++)

{

System.out.print(row[i]);

}

}

}

27) Fibonacci series:-

public class fibonacci {

public static void main (String[] args)

{ Scanner input = new Scanner (System.in);

int n = input.nextInt();

```
int a1 = 0; a2 = 1;
```

```
for (int i = 0; i < n; i++)
```

```
{
```

```
    System.out.print(a1 + " ");
```

```
    int a3 = a1 + a2;
```

```
    a1 = a2;
```

```
    a2 = a3;
```

```
}
```

```
}
```

```
}
```

2) square and cube:-

```
public class square &
```

```
public static void main (String[] args) &
```

```
Scanner input = new Scanner (System.in);
```

```
Float n = input.nextFloat();
```

```
System.out.print ("square: " + (n*n));
```

```
System.out.print ("cube: " + (n*n*n));
```

29) Frequency of Element:

public class element {

public static void main (String [] args) {

Scanner input = new Scanner (System.in);

int a[] = new int[] {1, 2, 8, 3, 2, 2, 2, 6, 1};

int b[] = new int [a.length];

int visited = -1;

for (int i = 0; i < a.length; i++)

{

int count = 1;

for (int j = i + 1; j < a.length; j++)

{

if (a[i] == a[j])

{

count++;

b[j] = visited;

}

}

if (b[i] != visited)

b[i] = count;

for (int i = 0; i < a.length; i++)

{

if (b[i] != visited)

```
System.out.println(a[i] + " " + a[i]);
```

```
}
```

```
} public static void main (String args[]) {
```

```
} Scanner input = new Scanner (System.in);
```

30. Hollow Square:

```
public class Hollow2
```

```
public static void main (String args[]) {
```

```
Scanner input = new Scanner (System.in);
```

```
int n = 5;
```

```
char c = input.next().charAt(0);
```

```
for (int i = 1; i <= n; i++)
```

```
{
```

```
for (int j = 1; j <= n; j++)
```

```
{
```

```
if (i == 1 || j == 1 || i == n || j == n)
```

```
System.out.print(c + " ");
```

```
else
```

```
System.out.print(" ");
```

```
System.out.println();
```

By

John C. Smith

The following table shows the results of the

analysis of the data for the year 1960.

The first column shows the number of

cases for each category.

The second column shows the percentage of

cases for each category.

The third column shows the total number of

cases for each category.

The fourth column shows the total number of

cases for each category.

The fifth column shows the total number of

cases for each category.

The sixth column shows the total number of

cases for each category.

The seventh column shows the total number of

cases for each category.

The eighth column shows the total number of

cases for each category.
